

County of Fairfax, Virginia

ADDENDUM

DATE: December 10, 2015

ADDENDUM NO. 1

TO: ALL PROSPECTIVE OFFERORS

REFERENCE: RFP2000001742

FOR: Sale and Recycling of Scrap Metal

DUE DATE/TIME: December 22, 2015 @ 10:00 a.m.

The referenced request for proposal is amended as follows:

The following are answers to questions submitted regarding this RFP:

- Q1. Will the vendors need to provide the containers mentioned in paragraph 4.2 of the RFP?
- A1. Yes, if the successful offeror is collecting and transporting the scrap metal from various county locations, then the successful offeror will also provide the containers. The costs of the collection, transportation and the container will be shown in the Business Proposal as the cost of collection of the various sized containers.
- Q2. Can a 30-yard container be substituted for a 20-yard one?
- A2. Yes, if the specific location has room for the larger container. It may need to be determined on a case-by-case basis. The County concurs that the 2 locations currently mentioned in paragraph 4.2, BACKGROUND, can accept the 30-yard containers.
- Q3. Would it be helpful to separate metals into segmented boxes? Would that get a better price?
- A3. Separation of ferrous and non-ferrous metals would be very helpful and would increase the price paid for metals.
- Q4. Could the County solid waste place containers at various county sites and collect/transport them to the vendors?
- A4. Yes, the County could choose to put containers at locations and then transport the metals to the successful offeror. The successful offeror would then pay the price for the metal. To date, the County has not chosen to use this method of collection, but it could in the future.

Phone: 703-324-3206, **TTY:** 1-800-828-1140, **Fax:** 703-324-3228

- Q5. Regarding the CFC removal, please clarify how that works. Does the offeror provide the equipment and the collection tanks?
- A5. The successful offeror would provide one set of the collection equipment to the I-66 Transfer Station and one to the I-95 Landfill along with the collection tanks. County staff is certified and will remove the CFCs from the appliances. The successful offeror will be responsible for collecting the tanks and correctly disposing of the CFCs.
- Q6. Would the County consider disposing of the CFCs under its HHW contract?
- A6. Yes, offerors could propose that if it would reduce the cost or increase the revenue proposed by the offerors. Offerors should also show their cost of providing the service as written in the RFP.
- Q.7. Can the offerors go to the County locations in paragraph 4.2 to see the scrap metal containers and environment?
- A.7. Yes, offerors must contact Cindy Joy, Contract Specialist, via email to cindy.joy@fairfaxcounty.gov, to make arrangements for site visit(s). Please indicate which location(s).
- Q.8. Paragraph 10 discusses proprietary information. If an offeror provides an unusual suggestion to the County about scrap metal recycling, can that information be proprietary?
- A.8. Offerors may make portions of their proposal proprietary. Please refer to Section 10, TRADE SECRETS/PROPRIETARY INFORMATION, of the RFP.

All other terms and conditions remain unchanged.

Cindy Joy, CPPB
Contract Specialist II
